

Amendments to the Specification

Please amend the Specification by replacing paragraph [0040] with the following replacement paragraph [0040]:

[0040] Referring to FIGURES 4 and 5, the latch device 30 is shown having a handle portion 32 (e.g. lever, etc.) pivotally coupled to pin member 34 (e.g. axle, etc.) by a pin member 37. The pin 34 has a spring member 36 and a projection shown as a “foot” 38 (e.g. hook, lobe, tab, etc.) configured to coact with the recess 22 on the rail 20.

The Applicants respectfully point out that the amendment to paragraph [0040] includes the “pin member” (and the assignment of an appropriate reference numeral, i.e. “37”) provided in the original disclosure of the Application in Claim 15, and as originally shown in Figures 4 and 5 of the Application as filed. No new matter has been added.
